

“My focus is on linking assessments to appropriate, individualized interventions. There’s a lot of research going on at the university level, but that information isn’t getting to the people who actually use it; the school systems, the teachers and the parents. I want to close that information gap so we can improve outcomes and save money. I understand the special education laws and I know what schools are looking for to qualify a student for special education services in public school systems.”

Nationally Certified School Psychologist with over 30 years experience in the field of school psychology and psycho-educational services:

**Offering Experienced Help & Guidance for
Children, Young Adults, Parents, Educators,
& Social Service/Mental Health Organizations**

Connecting is a journey....

Openings...

that they may sense clearly the path they choose to walk.

Vision...

to see, search, and dream without limitation.

Possibilities...

that they may discover what they want and need, know who they are, give to others of their hearts' joy, have the courage to stand for their own convictions.....

I provide the following psychoeducational services:

- Screening to comprehensive school neuropsychology evaluations of children & youth between 3 and 21 years of age who are presenting with a variety of learning, emotional and neurodevelopmental problems.
- Supporting/educating parents as they navigate the maze of school-based federal and state regulations for special education of students with mandated disabilities.
- Evaluating prior assessments to determine if they are adequate to diagnose the suspected problem.
- Evaluating current special education services to determine if they are research-based, evidence-based methodologies that will lead to enhanced learning.
- Counseling students about their disability; coaching students who need help with organization, time-management, and executive functioning; working with children/youth around social issues.

Sensitivity...

that they may hear and follow their own inner guidance, discern when to act on behalf of themselves and/or others, and when to simply be and let be.

Accomplishments...

that they may taste the fruits of success.

- Providing workshops and presentations on a variety of topics.
- Referring parents to other service providers as needed.
- Sensitivities and knowledge of cultural and ethnic differences with each student.

My specialty in school neuropsychology services provides unique and comprehensive services to children with neurological or neuropsychological trauma across the entire developmental spectrum.

I would look forward to helping you with your school, your organization, your children who have a need for a nationally certified, licensed and experienced professional. We can discuss the situations on a per project basis or per diem.

Call 860-442-1133 and let's talk!

and believe in themselves no matter what!
